OF THE

COMMISSIONER OF PATENTS

FOR

THE YEAR 1867.

VOLUME I.

WASHINGTON:

GOVERNMENT PRINTING OFFICE.
1868.

IN THE SENATE OF THE UNITED STATES,

January 29, 1868.

Resolved, That 4,000 additional copies of the letters from the Commissioner of Patents, transmitting Annual report of that office, be printed for the use of the Senate.

IN THE HOUSE OF REPRESENTATIVES,

June 5, 1868.

On motion of Mr. LAFLIN, from the Committee on Printing,

Resolved, That there be printed 15,000 extra copies of the Report of the Commissioner of Patents, 10,000 for the use of the House, and 5,000 for the Commissioner.

R E P O R T
OF
THE COMMISSIONER OF PATENTS
FOR
THE YEAR 1867.

JANUARY 14, 1868.—Referred to the Committee on Patents and ordered to be printed.

UNITED STATES PATENT OFFICE,
Washington, D. C., January 14, 1868.

SIR: I have the honor to transmit herewith the annual report of this office for the year 1867, to be laid before Congress.

I am, very respectfully, your obedient servant,

T. C. THEAKER,
Commissioner of Patents.

Hon. SCHUYLER COLFAX,
Speaker of the House of Representatives.

UNITED STATES PATENT OFFICE,
January 14, 1868.

SIR: I have the honor to submit the following report of the business of this office during the year 1867.

The receipts and expenditures of the office for the year, and the condition of the patent fund at its close, are shown by the following statements:

No. 1.

Number of applications for patents during the year	21, 276
Number of patents issued, including reissues and designs	13, 015
Number of caveats filed during the year	3, 597
Number of applications for extensions of patents	106
Number of patents extended	95
Number of patents expired	1, 005

Of the patents granted, there were to—

Citizens of the United States	12, 651
Subjects of Great Britain	191
Subjects of the French empire	80
Subjects of other foreign governments	93

No. 2.

Statement of money received during the year.

On applications for patents, reissues, appeals, &c	\$597, 205 75
For copies and for recording assignments	49, 376 17
	<hr/>
	646, 581 92
	<hr/> <hr/>

No. 3.

Statement of expenditures from the patent fund.

For salaries (including the extra 20 per cent.)	\$156, 546 50
Contingent expenses, miscellaneous	260, 812 85
Permanent improvements in the model room, library, draughts- man's room, and examiners' rooms	46, 301 98
Temporary clerks, (including the extra 20 per cent.)	155, 339 91
Withdrawals	200 00
Refunding money paid by mistake	1, 085 80
Judges in appeal cases	261 25
To this add the following items not heretofore paid from the patent fund, viz:	
For illustrations for report	16, 819 60
For expenses of copyrights	1, 895 43
	<hr/>
Total	639, 263 32
	<hr/> <hr/>

No. 4.

Amount to the credit of the patent fund January 1, 1867	\$264, 125 88
Amount of receipts during the year	646, 581 92
	<hr/>
Total	910, 707 80
From which deduct for expenditures	639, 263 32
	<hr/>
Leaving a balance to the credit of the patent fund January 1, 1868	271, 444 48
	<hr/> <hr/>

Valuable reports of sections have been received from the officers in charge relating to the subjects coming under their cognizance; their accompanying exhibits show that in each department the number of applications has increased, and the character of the inventions proves that the inventive faculty is still alive and usefully employed. The reports, however, generally agree in stating that, with some exceptions, the improvements are mainly in detail, perfecting and adapting what may be considered substantially as existing contrivances and processes.

Changes in the classification and in the alignment of cases having been lately made, a tabular account of the rate of increase of work in the different classes cannot be given satisfactorily. The purpose of the change, so far as it affects subjects, has been to secure more homogeneity in the classes, and to allot more systematically the floating cases, whose distribution has previously been rather arbitrary than consistent. Another incentive to reorganization in this particular has been the increase in the number of examiners and assistants, which is now one-fourth larger than at the date of my last annual report.

The new classification is nearly completed, and will shortly be printed. The number of classes has risen from 22 to 36, a number of subjects being now recognized individually which were formerly merged with others under a more generic title. Among these are builders' hardware, felting, illumination, paper, and sewing machines, to each of which subjects so much attention has been directed by inventors that a division became a necessity to secure a proper apportionment of work among the corps of examiners.

The American system, as it may be fairly called, has proved itself to be well

adapted to carry out the purpose of the law and the clause in the Constitution under which, in the interest of science and the useful arts, Congress has power to secure to inventors, for limited times, the exclusive right to their discoveries. The office has now a corps of experts to whom applications for patents are assigned for examination, who are intimately acquainted with the details of their respective classes, and whose judgment is worth to an inventor, in an average case, many times the cost of making the application for a patent.

It is believed that the value of the system, great as it is admitted to be, is not adequately understood, and to some the thorough acquaintance of an examiner with his class is simply regarded as a possible obstacle in the way of obtaining a patent. Such an apprehension cannot be felt by one who truly values the system, as, for instance, a *bona fide* inventor who has unwittingly followed in a path previously travelled by another; to him, though disappointed, the truth had far better come in this way than after expense has been incurred in operating under a patent whose worthlessness is only made apparent when the invention proves itself valuable and provokes litigation.

The student is well aware that the English practice of granting patents was originally a system of monopoly, extending to such things as tanning, the sale of salt in a given district, the importation of certain articles, and similar exclusive powers which proved vexatious exactions to the public.

The act of Parliament to discourage monopolies, passed some two centuries since, recites the legitimate subjects for such grants, and the wisdom of the conclusion then arrived at has not since been successfully called in question.

The advance made by the American system upon the practice which followed the legislation of the Parliament of King James consists in giving an intelligent examination to each application instead of granting a patent as a matter of course, and remitting the patentee to the public and the courts, when a few minutes examination by an expert would have determined to the inventor's ultimate satisfaction, though present chagrin, perhaps, that the invention was worthless on the ground of want of novelty or its inherent radical faults.

Viewing the office as a self-sustaining bureau under the control of the government, the accompanying exhibit is a cause for congratulation to all concerned: the inventors whose genius and industry have supported, and the legislators who have wisely recognized the rights of the inventors and the interests of the public, which are identical.

A glance at the tabular statement of the office business for a series of years shows that the constant increase in the number of applications has not been attended by a proportionate increase in the expenses of the office; this is true even of this year, although over \$100,000 has been expended, as shown in the financial statement, for permanent improvements and other objects out of the ordinary course. The machinery is working with less friction and loss; economy and system have been equally studied, and while details may yet be amended to complete the symmetry of the organization, the office is deservedly popular and respected as an American institution, the legitimate exponent of the useful arts, whose progress it was designed to promote.

The following table shows the average cost of each examination for a series of years, the calculation being based upon the number of applications and the gross expenditure of the office in each year:

1840.....	\$51 00	1849.....	\$39 75
1841.....	62 18	1850.....	36 52
1842.....	41 05	1851.....	38 49
1843.....	37 55	1852.....	36 34
1844.....	34 68	1853.....	49 71
1845.....	31 62	1854.....	50 28
1846.....	36 29	1855.....	40 48
1847.....	27 35	1856.....	40 31
1848.....	36 18	1857.....	44 35

1858.....	\$36 01	1863.....	\$31 49
1859.....	33 78	1864.....	32 97
1860.....	33 04	1865.....	25 72
1861.....	47 49	1866.....	23 69
1862.....	36 28	1867.....	30 04

The expenditure in 1867 for 20 per cent. extra salaries, (according to act of Congress,) permanent improvements, illustrations for report and copyright expenses, (see financial statement No. 3,) divided among the applications of the year, renders the average nearly \$5 higher than it would otherwise appear.

The increase in the clerical force, both expert and routine, and the multiplication of the office records, drawings, and books of reference, has not been accompanied by an adequate extension of room and facilities for work. The urgent pressure in the examiners' department has been somewhat relieved by the assignment of additional rooms, but the employés in other sections are suffering from lack of space wherein to arrange and execute their work. In fact, the public passages and rooms cut off from them are now used to afford accommodation, incomplete as it is, for those employés for whom no rooms can be found.

The librarian again calls my attention to the inadequacy of the room for the proper display and the convenient handling of the books. I have nothing to add to my report of last year on this subject, except that the necessity for more room is every year more apparent, and the limitation more irksome as the books become more closely crowded and the space available for their consultation is diminished.

The space and facilities for the arrangement of the caveats are altogether inadequate and unsuitable. It has been my desire to isolate them in a manner consistent with their official character, but want of room has precluded the perfecting of any suitable arrangement therefor.

The great assemblage of drawings of patented and rejected applications occupies much room, but needs more. A very thorough style of improvement in the substitution of sliding and tilting drawers for the ordinary portfolios, has made their handling and consultation much more convenient and expeditious. They, however, cannot be kept within the present bounds, and the constant augmentation aggravates the inconvenience.

The drawings now number over 100,000, and are becoming torn and soiled by the constant but legitimate wear to which they are exposed. Photography seems to offer the only means for renewing them. For some time past I have had it in contemplation to have photographic copies of uniform size made from the current issues and the drawings of former patents, so as to furnish to each examiner a copy of all the drawings appertaining to his class, enabling him to consult them without going to the draughtsman's room, where the space is insufficient for the purpose. This would much facilitate the examination of applications, which becomes a heavier task annually as the drawings accumulate. A set of the drawings might be bound and placed in the library for public inspection, and copies furnished to other public institutions which might be disposed to order them. Copies of the drawings might thus be furnished at a reasonable price and afford a revenue to the office.

If this plan were adopted, applications might be filed with but a single drawing, instead of two, as is the present practice, and a fac-simile of the drawing of record, in most cases of even size with the face of the patent, might be attached thereto.

It has been my purpose to commence by photographing each week the current issues and several hundreds of the back issues, so as gradually to accumulate a full copy of the record, and where a drawing may be lost to take a photographic view of the model, which might stand in its place. The copies thus made would be of even size and smaller than the average of the originals, which would

enable them to be placed in compact form and greatly to economize the room occupied by them.

The printing of the specifications was commenced November 20, 1866, and the size of the patents was reduced from 15 by 20 to 10 by 15 inches. The letters patent are thus of a more convenient size for all purposes. A number of copies of each are struck off while the type is set. One copy is attached to the face of the letters patent, of which it forms the "accompanying specification;" one is bound with its fellows in consecutive order to form a book of records; two are sent to the commissioners of English patents, as a slight, though utterly inadequate, return for the magnificent series of English patents which have been and continue to be furnished gratis to us by them as they are issued.

Printed copies are now furnished to all who order them at one-half the former price for the manuscript, and at a profit to the office about equal to the loss on each under the former practice, which was about four cents per hundred words for each copy.

The condensation of the matter, incident to printing, gives compactness to the record, secures exact correspondence between the original and the record, and is a safeguard against change in either.

The time will soon arrive in which it will be prudent to dispose of all models of rejected applications; the amount of room they take can be much better occupied. The model saloon in the west wing of the office is now almost entirely devoted to them, and will soon be required for the display of models of patented inventions. The office will remain in possession of the files and drawings in each rejected case, which will be sufficient for its purpose in preserving the record.

The business of the office is now reported by the examiners of classes as being up to date, so that applications are examined without delay, which is much more satisfactory to all parties than formerly, when it was weeks, and in very many cases months, in arrears. This is in the face of the fact that the business of the office is rapidly increasing, as is shown in the exhibit appended, the number of applications being three times the number received in 1864.

All of which is most respectfully submitted.

T. C. THEAKER,
Commissioner.

Acid, carbonic, Condensing and drawing off, and applying the same for cooling and freezing.	T. S. C. Lowe	63, 405
Acid, carbonic, Producing and manufacture of, and in the application of the same for various useful purposes.	S. Stevens	68, 321
Acid, Compound, for use in baking and cooking	J. E. Lauer	62, 277
Acid, sulphuric, and other liquids, Concentrating	J. Hughes	65, 277
Acid, sulphuric, Concentrating	D. Ashworth and R. B. Eaton	62, 919
Acid, sulphuric, Concentrating	J. D. Loftus	60, 759
Acupuncture, Instrument for	A. R. Brown	60, 917
Adding machine	V. Parks	62, 677
Addressing machine	R. Dick	64, 502
Advertising apparatus	J. A. Royce	66, 637
Advertising, Device for	A. Davis	69, 637
Advertising machine	I. W. Sylvester	66, 055
Aerial carriage and way	D. Towse	71, 921
Aerial carriage and way	D. Towse	71, 922
Aerial carriage and way	D. Towse	71, 923
Aerial machine	J. A. Elston	67, 739
Air and gas, Carburetting	J. F. Boynton	61, 309
Air and gas, Carburetting	J. Kidd	62, 855
Air and gas, Carburetting	J. S. Stephenson	63, 326
Air and gas, Carburetting	D. Hall	63, 511
Air and gas, Carburetting	G. W. Porter	64, 361
Air and gas, Carburetting	J. F. Barker and C. N. Gilbert	66, 777
Air and gas, Carburetting	J. F. Boynton	70, 512
Air and hydrocarbon vapors, Explosive mixture of	J. Kidd	62, 856
Air and other substances, Cooling	D. E. Sones	70, 909
Air and steam jets, Combination of, to promote combustion	G. M. Copeland	62, 397
Air, Carburetting	W. H. Clarke	63, 215
Air, Carburetting	W. F. Cozzens and J. H. Jones	70, 809
Air, Carburetting	C. N. Gilbert, J. F. Barker, and E. N. Ives	61, 004
Air, Carburetting	B. Douglas and W. H. Walton	61, 656
Air, Carburetting	E. S. Hutchinson and H. L. McAvoy	61, 739
Air, Carburetting	A. C. Rand	62, 364
Air, Carburetting	J. H. Irwin	66, 153
Air, Carburetting	L. Stevens	63, 667
Air, Carburetting	L. Stevens	65, 296
Air, Carburetting	J. C. Pedrick	66, 622
Air, Carburetting	J. H. Springer and J. C. McDonald	66, 749
Air, Carburetting	F. S. Pease	67, 576
Air, Carburetting, and regulating its flow	J. S. Wood	66, 545
Air, carburetting, Combination apparatus for	L. Stevens	68, 666
Air, Compressing	J. E. J. Mignon and S. H. Rouart	63, 075
Air, Condensing	O. Abruzzo	70, 934
Air conductor, Portable hot	J. B. Oldershaw	72, 074
Air, Drying and purifying, for preserving animal and vegetable substances.	E. D. Brainard	66, 786
Air-heating apparatus for steam boiler furnaces, &c	A. C. Fletcher	64, 090
Air, Moistening, cooling and warming	D. E. Sones	61, 886
Air to life boats, Supplying	P. F. Schenck	65, 953
Alarm and lighter	T. N. Howell	72, 854
Alarm and lock attachment for money drawers	J. H. Weaver	68, 816
Alarm, Burglar	I. M. Wells	65, 710
Alarm, Burglar	H. B. Robbins	65, 949
Alarm, Burglar	C. E. Pierce	66, 040
Alarm, Burglar	O. M. Brooks and R. W. Soper	66, 457
Alarm, Burglar	S. Whitaker	67, 619
Alarm, Burglar	E. F. Mallory	68, 520
Alarm, Burglar	T. Royer	71, 537
Alarm, Burglar	G. S. Acker	69, 888
Alarm, Burglar	D. D. Skelly	71, 073
Alarm, Burglar	E. C. C. Kellogg	71, 180
Alarm, Burglar	R. Bunker	69, 604
Alarm, Burglar	H. Behn	62, 998
Alarm, Burglar	B. F. and J. F. Cunningham	72, 459
Alarm, Burglar	C. Waterman	63, 124
Alarm, Burglar	C. J. Crum and W. Irwin	72, 723
Alarm, Burglar	L. W. Blakeslee and A. D. Smith	72, 786
Alarm, Burglar	G. A. Colton	60, 695
Alarm, Burglar	R. G. Fowler	60, 711
Alarm, Burglar	J. G. Trout	63, 582

Alphabetical list of inventions—Continued.

Invention or Discovery.	Name of Patentee.	No.
Alarm, Burglar	C. A. Eaton	68, 857
Alarm, Burglar	T. Royer	71, 537
Alarm, Burglar and fire	J. Holmes and C. W. Nickerson	62, 033
Alarm, Burglar, and lock apparatus	C. E. Pierce	71, 637
Alarm, Burglar, for safes	B. G. Fitzhugh	61, 061
Alarm, Clock	J. Decker	62, 531
Alarm, Fire	W. W. Andrews, J. Cummer, J. F. Ganwieler, and J. Stengel	65, 526
Alarm, Fire	I. T. Pease	72, 672
Alarm, fire, Annunciating	A. and E. Fontaine	69, 648
Alarm, Fog	J. C. Lyons	68, 763
Alarm, Leakage, for vessels	G. B. Massey	62, 144
Alarm, Low-water, for steam generators	R. T. Crane	67, 506
Alarm, Low-water, for steam generators	S. B. Palmer	62, 150
Alarm, Low-water, for steam generators	J. H. Springer and W. M. Bartram	62, 230
Alarm, Money drawer	J. F. Winchell	61, 297
Alarm, Money drawer	I. Robbins	63, 531
Alarm, Railroad-switch	T. S. Hall	62, 414
Album	A. Hathaway	67, 540
Albumen	J. M. Fuchs	72, 625
Alcohol and other liquids, Compound vacuum rectifier for	T. Simmons	61, 770
Alcohol and other pure distillates, Manufacture of	J. F. Collins	60, 835
Alcohol and other spirits, Rectifying	J. G. Bequet	61, 388
Alcoholic spirits, Manufacturing	J. W. Richardson	62, 070
Ale, beer, &c., "Hopping"	W. S. Haight	66, 833
Ale, Brewing	C. Clifford	63, 994
Ale, eider, &c., Compound for refining	W. M. Davis	65, 063
Alloy for dentist's use	M. M. Johnston	71, 307
Alloy for journal boxes and other purposes	G. W. Disman	69, 783
Alloy for making plates and sheets	J. D. Grüneberg	71, 479
Alloy for mold boards and other parts of plows	O. F. Burton	61, 997
Alloy for sabots of projectiles	T. Taylor	61, 117
Alloy for the manufacture of metal sheets, &c.	L. Brandeis	70, 513
Alloy, Metallic compound for	J. Hackert	65, 563
Alloy of metals used in forming water pipes and other articles, Manufacture and uniting	W. A. Shaw	72, 919
Alloy to imitate silver	A. Schmitte and H. A. Levallois	71, 072
Allumettes, Paper	B. B. Lehman	63, 265
Alum, sulphate of alumina, and other aluminous compounds, Manufacture of	H. Pemberton	60, 780
Alumina, sulphate of, Treatment of	A. A. Croll	65, 175
Aluminium, Casting	J. B. Bean	68, 548
Amalgamator	D. E. Rose	61, 262
Amalgamator	A. J. Senatz and G. W. Knowlton	64, 258
Amalgamator	W. L. Strong	64, 458
Amalgamator	R. W. Howard	65, 912
Amalgamator	J. B. Forrisier	66, 142
Amalgamator	G. B. Field	68, 175
Amalgamator	H. A. Gaston	68, 359
Amalgamator	F. G. Hesse	69, 564
Amalgamator	W. W. Hubbell	69, 672
Amalgamator	A. Swazey	70, 646
Amalgamator	S. Standish	61, 274
Amalgamator	J. A. Robinson, jr	61, 465
Amalgamator	F. W. Crosby	63, 221
Amalgamator	A. Hunter	64, 534
Amalgamator	T. G. Chubb	67, 498
Amalgamator	A. Horn	71, 011
Amalgamator	F. G. Hesse	70, 839
Amalgamator and concentrator	G. Johnston and E. G. Smith	66, 499
Amalgamator, Cylindrical	T. M. Fell	60, 709
Amalgamator for ores of gold and silver	W. M. Fuller	72, 626
Ammonia, Manufacture of	A. Paraf	67, 447
Ammunition in chests and boxes, Packing	F. L. Hagadorn	71, 298
Anesthetics, Administration of	O. Wilson	71, 934
Anchor	G. A. Lloyd and C. A. Stewart	66, 665
Anchor	C. T. Julius	60, 963
Anchor	W. J. Armstrong and C. Browne	70, 498
Anchor, Floating	G. L. Baker	61, 983
Anchoring stationary machinery	C. B. Whittemore	68, 402
Anchor, Revolving	J. Luke Hauly	64, 762
Anchors, Casting	J. Evans, jr	67, 741
Anchor stock	N. W. Wheeler	65, 625
Anchor, Water	S. Boone	67, 943
Animal and vegetable substances	J. and A. Gamgee	71, 377
Animal and vegetable subst. nces, Preserving	L. H. Spear	67, 921
Animal intestines, Composition for preserving	T. L. Reed	71, 787
Animal matter, Cutting and grinding	A. Smith	71, 544
Animal poke	G. W. Carpenter	72, 265
Animals, Apparatus for taming wild	P. R. Sanderson	71, 914
Animals, Device for catching	W. L. Hopper	68, 197

Engine, Oscillating	W. M. Elrod	67, 966
Engine, Reciprocating	W. D. Grimshaw	64, 972
Engine, Revolving cylinder	C. Scott and W. H. Morton	68, 008
Engine, Rosette	C. H. Field	66, 819
Engine, Rotary	M. Hanford	67, 978
Engine, Rotary	W. Atwood	68, 337
Engine, Rotary	M. L. Andrew	69, 383
Engine, Rotary	E. Chapman	70, 802
Engine, Rotary	F. Ortlieb	71, 208
Engine, Rotary steam	J. P. Birch	63, 694
Engine, Rotary steam	S. H. Brown	64, 068
Engine, Rotary steam	J. B. Van Deuson	64, 600
Engine, Rotary steam	J. E. Gillespie	65, 483
Engine, Rotary steam	J. H. Van Sandt and J. J. Hurt	65, 312
Engine, Rotary steam	W. H. Holland	66, 085
Engine, Rotary steam	J. R. Willett and L. Brien	61, 695
Engine, Rotary steam	T. Banta	65, 154
Engine, Rotary steam	M. Gabriel	67, 527
Engine, Rotary steam	C. Kaiser	66, 092
Engine, Rotary steam	J. Darling	66, 570
Engine, Rotary steam	S. G. Hall	68, 186
Engine, Rotary steam	L. Carpenter	68, 602
Engine, Rotary steam	J. Q. Welch	68, 920
Engine, Rotary steam	R. W. Riess	69, 705
Engine, Rotary steam	A. S. Harlan	71, 384
Engine, Rotary steam	R. D. Pettit	72, 537
Engine, Rotary steam	F. Fischer	62, 190
Engines and other machinery off their center, Starting	A. Sims	66, 527
Engines, carding, Self feed	R. W. Lewis	61, 219
Engines, carding, Guide for	F. W. and E. Albertine	66, 112
Engines, carding, Stop motion for feeding mechanism of	W. L. Ainsworth and A. D. Wright	62, 917
Engines, cut-off for, Governor	J. Felber	61, 528
Engines, gas, Electric apparatus for lighting	O. Hammel	65, 808
Engines, motive power, Forming an explosive mixture of air and hydro-carbon vapor for use in	J. Kidd	62, 856
Engines, rock-drilling, Stand for	F. B. Doering	72, 466
Engines, oscillating, Tube gear for	J. H. Murrill	62, 874
Engines, pumps, pistons, &c., Materials for	D. Bickford	72, 590
Engines, steam, Cut-off for	A. Stuckenrath	60, 804
Engines, steam, Cut-off for	G. W. Rawson	70, 743
Engines, steam, Cut off valve gear of	W. Wright	62, 797
Engines, steam, Escape pipe for	J. Smith	67, 364

Kneeling-board and foot-rest	H. Morrison	62, 434
Knife	N. W. Canghy	72, 365
Knife and door fastening	A. W. Hall	67, 044
Knife and fork	J. H. Nichols	70, 352
Knife and fork cleaner	B. F. Hughson	68, 079
Knife and fork cleaner	J. Merritt	72, 067
Knife and scissors, Combined	C. W. Sykes	62, 702
Knife and scissors sharpener	M. T. Chapman	62, 472
Knife and scissors sharpener	A. Herthal	66, 837
Knife and scissors sharpener	J. N. Jacobs	71, 491
Knife and watch-key, Combined	E. Q. Norton	63, 171
Knife, Carving, and fork holder	A. T. Foster	72, 009
Knife cleaner	R. R. Pattison	61, 245
Knife cleaner	N. P. Mulloy	61, 556
Knife cleaner	W. J. Burge	66, 123
Knife cleaner	C. F. Dean	67, 169
Knife cleaner	C. C. Morgan	67, 336
Knife cleaner	I. Jewett	67, 434
Knife cleaner	J. F. Hammond	67, 534
Knife cleaner	H. Woodward	69, 601
Knife cleaner	J. A. Ewins	69, 905
Knife cleaner	L. Goulding	72, 021
Knife cleaner and sharpener	L. J. Johnson	70, 574
Knife, Hay	P. O. Soper	61, 576
Knife, Hay	H. M. Smith	68, 536
Knife, hook, and saw, Pruning	R. W. Porter	68, 109
Knife, Mincing	S. C. Ketchum	65, 233
Knife, Pocket	G. and J. Kay	60, 905
Knife, Pocket	R. B. Milliken	61, 229
Knife, Pocket	C. H. Palmer	64, 248
Knife, pocket, and door fastener, Combined	B. F. Porter	70, 609
Knife sharpener	G. B. Markham	64, 342
Knife sharpener	J. Meyer, jr	64, 637
Knife sharpener	M. Young	67, 011
Knife sharpener	T. K. Knapp	67, 200
Knife sharpener	T. Haynes	69, 993
Knife sharpener	J. C. Reynolds	70, 360
Knife sharpener	A. B. Bean	71, 442
Knife, Shoe	H. Sauerbier	69, 490
Knife, Shoe	H. Sauerbier	69, 491
Knife, Table	P. Neff	68, 307
Knife, Tobacco belting	J. B. Worsham	64, 823
Knives, polishing, Composition for	A. W. Stewart	71, 810
Knitting machine	W. H. McNary	64, 241
Knitting machine	A. Paget	64, 900
Knitting machine	A. C. Carey	67, 263
Knitting machine	W. Cotton	67, 727
Knitting machine	J. Pepper	68, 107
Knitting machine	S. V. Essick	68, 425
Knitting machine	D. Bickford	68, 595
Knitting machine	T. Crane	69, 775
Knitting machine	T. Crane	69, 776
Knitting machine	J. Teachout	72, 116
Knitting machine	J. Teachout	72, 117
Knitting machine	W. H. H. Holden	72, 296
Knitting machine	W. Aiken	72, 771
Knitting machine register	B. F. Wyman and B. H. Hartshorn	68, 928
Knitting machine, Rotary	M. L. Roberts	64, 572
Knitting machines, circular, Take-up mechanism for	S. Ward	62, 239
Knitting machines, Knot-indicator for	J. F. Stewart	64, 046
Knitting machines, rotary, Take-up for	J. Teachout	72, 115
Knitting machines, Take-up mechanism for	T. Crane	61, 603
Knob, Elastic carriage curtain	W. H. Hawkins	71, 613
Knob, latch and lock, Combined	M. B. Foote	70, 081
Knob-latch, Locking	C. H. Effler	71, 721
Knob, Mineral	J. Jones	68, 885
Knobs, door, Attaching	D. B. Cobb	68, 956
Knobs, door, Attaching to spindles	C. B. Bristol	72, 597
Knobs, door, Attaching to their shank	W. T. Munger	62, 967
Knobs, door, Attaching to their spindles	C. B. Bristol	62, 599
Knobs, door, Stamping clay	G. Lawton	65, 244
Knobs to door-latches, Attaching	W. H. Andrews	63, 980
Knobs to spindles, Adjusting	A. Daves	72, 815
Knobs to the spindles of door latches, Attaching	W. F. Munger	71, 592
Knuckle joint	G. B. Garlinghouse	64, 757
L.		
Label and tag	T. Percival	71, 323
Label, Baggage	J. M. March	68, 634
Label, Direction	G. E. Pevey	62, 561

Ladder, Step and extension	T. Vogelmann	67, 235
Ladder, Step and extension	H. W. Covert	69, 321
Ladder, step, Fruit	C. J. Komar	68, 090
Ladle for pouring metal	J. F. Winchell	61, 129
Lamp	H. W. Benton	66, 285
Lamp	F. Burrows	61, 152
Lamp	J. Davis, jr.	63, 999
Lamp	H. M. Beidler	64, 474
Lamp	M. B. Dyott	64, 508
Lamp	J. S. Hull	64, 768
Lamp	J. H. Irwin	65, 230
Lamp	E. D. Norton	65, 935
Lamp	J. K. Andrews	66, 278
Lamp	H. Weston	67, 670
Lamp	H. L. Hanson	68, 136
Lamp	P. Hoffman	69, 091
Lamp	A. Judson	69, 436
Lamp	W. Mullally	69, 815
Lamp	J. B. Slawson	70, 247
Lamp	M. Jincks	70, 635
Lamp	A. P. Tyler	70, 856
Lamp	J. Lee	72, 764
Lamp	C. St. John	70, 867
Lamp	C. N. Tyler	71, 242
Lamp	G. A. Beidler	71, 242
Lamp	T. Clough	71, 354
Lamp	T. Clough	71, 449
Lamp	H. Young	71, 566
Lamp	H. E. Burton	72, 219
Lamp	J. B. Alexander	72, 376
Lamp	G. Neilson and E. Egginton	72, 683
Lamp	L. F. Dryell and N. Clifford	71, 460
Lamp	C. W. Peasley	72, 068
Lamp	T. Crowley	72, 078
Lamp and cane, Combined	A. Mochau	61, 092
Lamp black	R. N. Peorlee	71, 396
Lamp black	R. Pattin	69, 439
Lamp chimney cleaner	J. B. Lightner	71, 538
Lamp chimney cleaner	P. Howell	61, 454
Lamp chimney cleaner	E. Russell	71, 221
Lamp chimney fastening	L. A. Plumb	71, 221
Lamp, coffee-pot, and boiler, Combined	F. Rohrer	71, 112
Lamp extinguisher	G. E. Abbott	
Lamp extinguisher		

Alphabetical list of inventions—Continued.

Invention or Discovery.	Name of Patentee.	No.
Lamp extinguisher	F. B. Hill and W. H. McCoy.	70, 567
Lamp extinguisher	G. Simpson and W. H. Edmunds.	66, 526
Lamp extinguisher	E. Shaw	65, 696
Lamp extinguisher	M. Safford.	64, 578
Lamp extinguisher	L. M. Sargent.	70, 125
Lamp extinguisher	W. P. Bennett	70, 392
Lamp for burning off paint.	W. W. Wakeman, jr.	65, 621
Lamp for burning petroleum.	J. and J. Hinks	72, 040

Invention or Discovery.	Name of Patentee.	No.
Lever pitman, Reverse	J. and W. W. Porter	68, 900
Lid for kettles, pails, &c.	S. B. Cox	67, 847
Life preserver	J. M. Billhofer	64, 939
Life preserver	J. Shaw	65, 287
Life preserver	R. Robinson	70, 121
Life preserver	D. H. Heyen	71, 755
Life-preserving berth	J. J. Clyde	62, 609
Life-preserving float and mattress	L. Bauhoefer	63, 831
Life-preserving seat	H. Matthews	62, 433
Lifting apparatus	W. L. Jones	63, 526
Light, calcium-magnesium, Producing	C. A. Dresser	71, 860
Lighter and alarm	T. N. Howell	72, 854
Light-house or floating battery	J. Moody	62, 870
Light, Locomotive head, Gasoline	J. B. Terry	72, 697
Lightning arrester	A. Barbarin	68, 407
Lightning conductor	J. A. Kissell and N. Blickensdufer	64, 774
Lightning conductor	W. G. Pike	70, 741
Lightning rod	C. Jillson	61, 741
Lightning rod	C. Stearns	65, 775
Lightning rod, Corrugated	J. A. Kissell and N. Blickensdufer	66, 854
Lightning-rod insulator	D. Stebbins	66, 054
Lime, bisulphite of, Application of	W. Marr	70, 588
Line holder	W. Morse	68, 304
Line holder	D. Peters and R. F. Williams	69, 696
Line holder	S. J. Clark	71, 709
Line or rope holder	A. J. Chase	69, 767
Lines, Rounding	L. B. Gates	68, 972
Liniment	J. W. Burnham	62, 111
Liniment	H. Stonebraker	62, 298
Liniment	J. Gifford	62, 403
Liniment	J. S. Lightner	63, 269
Liniment	L. B. Cram	63, 995
Liniment	J. C. Dustan	64, 649
Liniment	E. M. Carpenter	65, 170
Liniment	R. Newcomb	65, 688
Liniment	P. Baumann	67, 706
Liniment, Anti-rheumatic	J. Galette	66, 482
Liniment for cure of foot rot in sheep	W. H. Lawes	62, 644
Liniment, Vegetable	T. L. Upton	63, 965
Lining drawing, Hatch	E. K. Haynes	72, 636
Link and hook, Connecting	R. Creuzbaur	63, 996
Link, Connecting	R. Creuzbaur	66, 303
Link, Connecting	R. Creuzbaur	70, 172
Links for cables and other shelley ^{mechanical} means for making	A. Homfray	70, 845
Links, Machine for cutting bars for chain	G. Homfray	62, 488
Links, Machine for preparing rods for chain	G. Homfray	62, 335
Liquid for bleaching and removing stains	M. E. Tompkins	71, 426
Liquid for carburetting gas tar	L. E. Holden	61, 662
Liquid for carburetting gases	J. A. Bassett	64, 831
Liquid for distillation and for other purposes, Fermenting	R. D'Heureuse	67, 512
Liquid for making ice and for other purposes	P. H. Vanderveyde	72, 431
Liquids, Aërating	E. L. Pratt	68, 788
Liquids, aërating, and manufacture of soda water, Apparatus for	J. Matthews, jr	68, 375
Liquids, as fuel, hydrocarbon, Burning	A. J. Works	61, 131
Liquids, cane juice and other, Evaporating and concentratg	A. Fryer	65, 205
Liquids, Cooling	M. Gould	69, 797
Liquids, Distilling and evaporating	P. T. Badoux	61, 651
Liquids, Draining and weighing	E. S. Harris and S. S. Robinson	66, 149
Liquids, Evaporating	L. C. England	65, 065
Liquids, hydrocarbon, as fuel, Using	F. Cook	68, 705
Liquids, hydrocarbon, Burning	C. Fisher	67, 108
Liquids, hydrocarbon, Vaporizing	J. A. Bassett	68, 686
Liquids, hydrocarbon, Vaporizing and burning	F. Cook	68, 702
Liquids, hydrocarbon, Vaporizing and burning	F. Cook	68, 703
Liquids, hydrocarbon, Vaporizing and decomposing in the presence of steam	F. Cook and J. A. Bassett	68, 708
Liquids, malt and other, Fermenting	G. Wallace	62, 581
Liquids, Measuring	A. Fickett and J. C. Ware	65, 897
Liquids, Mixing	A. Watkins	69, 054
Liquids on draft, Cooling	A. Whyte	65, 329
Liquids, Rectifying distilled	A. Presichon and L. Jarchow	66, 323
Liquids, saccharine, Filtering, evaporating, and granulating	I. Hopkins	61, 200
Liquids, sulphuric acid and other, Concentrating	J. Agnes	65, 227
Liquor, alcoholic, Ageing	J. Martin	64, 990
Liquor and other spirits, Weighing	S. Hawkins	61, 425
Liquor and wine, Ageing and refining	R. Furner	69, 275
Liquors, malt and spirit, Preventing fraud on the revenue derived from	E. J. J. J. and A. Steurnagel	61, 913
Liquors, malt, Boiling, cooling, and fermenting	T. Hy and R. A. Robertson	64, 011
Liquors, malt, Cooling	W. Pagton	69, 930
Liquors, malt, Drawing and preserving	H. Mißdorf	69, 013

Alphabetical list of inventions—Continued.

Invention or Discovery.	Name of Patentee.	No.
Liquors, spirituous, Distilling and rectifying	M. Neuman	62, 670
Liquor used in treating straw, wood, &c., Saving and utilizing the alkaline.	S. Pettibone	71, 783
Loading and dumping machine	W. Goff	70, 196
Lock	L. P. Decker	61, 055
Lock	W. Dickson	63, 230
Lock	H. D. Richardson	64, 568
Lock, Alarm	J. S. and R. Porter	62, 683
Lock, Alarm, for tills	D. K. Miller	63, 922
Lock, Alarm, for tills	C. Tucker	64, 598
Lock and alarm attachment for money drawers	J. H. Weaver	68, 816
Lock and key	H. B. Weaver	60, 974
Lock and knob latch, Combined	E. F. G. Arndt and C. E. L. Moebius	67, 938
Lock apparatus and burglar alarm	C. E. Pierce	71, 637
Lock, Burglar alarm	G. Jacobs	66, 090
Lock, Canal	J. Burt	65, 054
Lock, Canal	G. Heath	66, 151
Lock, Canal	M. Bishop	68, 833
Lock, Canal	H. H. Day	69, 639
Lock, Car seat	S. Bowles	62, 311
Lock, Car seat	M. P. Ford	66, 479
Lock, Car seat	E. Hamburjer	68, 436
Lock, Door	R. Vollschwitz	60, 970
Lock, Door	F. Just	62, 036
Lock, Door	F. F. Landis	62, 545
Lock, Door	A. Leich	62, 645
Lock, Door	D. C. Jordan	62, 753
Lock, Door	E. W. Brettell	63, 204
Lock, Door	S. L. Chase	63, 214
Lock, Door	E. P. Porter and G. W. Hallett	63, 295
Lock, Door	W. J. and J. W. Harris	64, 975
Lock, Door	W. P. Wentworth	66, 059
Lock, Door	E. Allen and J. Brady	68, 334
Lock, Door	H. R. Gillingham	68, 622
Lock, Door	M. and J. Knapp	70, 576
Lock, Door	E. P. Porter and G. W. Hallett	71, 411
Lock, Door	R. Schade	71, 534
Lock, Door	J. H. Morse	70, 599
Lock, Door	H. Jackson	72, 499
Lock, door, Burglar alarm	E. Tracy	71, 822
Lock, door, Compound	G. Hubert	67, 116
Lock, door, Prison	C. E. Felton	67, 641
Lock, door, Safety guard	R. K. Lee	63, 063
Lock, Drawer	G. B. ^{Gaylord} Cooper	60, 874
Lock for car doors, &c.	G. B. F. Cooper	64, 635
Lock for traveling bags	C. H. Schubens	72, 914
Lock, knob and latch, Combined	B. Ssegmuler	67, 140
Lock, latch and knob, Combined	M. E. Foote	70, 081
Lock, Magnetic	L. C. Springer	60, 953
Lock, Pad	A. Leyden	62, 862
Lock, Pad	B. J., S. B. and A. H. Ebert	69, 645
Lock, Pad	C. H. Miller	62, 353
Lock, Pad	I. D. Bush	63, 467
Lock, Pad	H. Jackson	65, 388
Lock, Pad	W. Bobannan	67, 401
Lock, Pad	W. H. Murphy	68, 527
Lock, Pad	C. J. Clements	72, 166
Lock, Pad	H. Eiffer	72, 378
Lock, pad, Combination	J. B. Green	72, 845
Lock, pad, Register	A. S. Harding and N. Reed	63, 722
Lock, pad, Sealing	Z. L. Chambers	70, 409
Lock, pad, Sealing	J. Kelly	62, 636
Lock, Permutation	R. M. Webb and I. Hermann	67, 089
Lock, Permutation	J. Corbett	61, 810
Lock, Permutation	C. Flesch	62, 191
Lock, Permutation	E. A. Barrows	62, 388
Lock, Permutation	G. B. Atwood	63, 133
Lock, Permutation	G. B. Atwood	63, 324
Lock, Permutation	S. Wheeler	64, 605
Lock, Permutation	A. W. Johnson and G. Thompson	64, 880
Lock, Permutation	W. F. Kistler	66, 502
Lock, Permutation	C. L. Lucas	68, 219
Lock, Permutation	E. W. Brettell	68, 281
Lock, Permutation	S. Wheeler	68, 922
Lock, Permutation	C. Flesch	71, 373
Lock, Permutation, for doors	I. W. Lamb	72, 408
Lock, Piano	T. J. Sullivan	67, 927
Lock, Piano	E. L. Gaylord	68, 496
Lock, Piano	E. L. Gaylord	68, 497
Lock, Piano	A. Holmstaedter	72, 038
Lock, Row	G. A. Browne	64, 280

Steamers, culinary, Bottom for	W. S. Potwin	64, 142
Steamers for cooking	M. C. Cronk	71, 284
Steamers for culinary purposes	A. L. Whitney	63, 772
Steam for heating and evaporating, Using	H. Merrill	64, 347
Steam, Generating, and heating water	H. Howard	68, 987
Steam, Heating and cooking by	F. Milliken	62, 148
Steam superheater	L. R. Cornell	69, 411
Steel and iron, Manufacture of	C. Usher	62, 706
Steel and iron, Manufacture of	L. Sibert	64, 916
Steel and iron, Manufacture of	H. K. York	72, 579
Steel and iron, Manufacture of	J. Park, jr.	72, 755
Steel and iron, Manufacture of refined ingots of	C. Shunk	70, 476
Steel blades, &c., Treating	H. Disston	64, 954
Steel blades, Hardening and straightening	H. Disston	67, 734
Steel, Cast	F. Ellershausen	69, 417
Steel, Cast	E. L. Seymour	71, 230
Steel direct from ore, Making	T. J. Chubb	65, 473
Steel, Hardening	C. T. J. Hayden	70, 210
Steel, iron, and other metals, Refining	J. Reese	65, 830
Steel, Making	T. H. Jenkins	67, 121
Steel, Manufacture of	A. B. Bérard	65, 333
Steel, Manufacture of	J. R. Bradley	72, 162
Steel or iron, Manufacture of bars or rods of	E. Lauth	62, 753
Steel or iron with copper, Uniting	E. T. Ligon	69, 001
Steel plates, Curved corrugated	R. Montgomery	63, 077
Steel plates, Tempering	C. Richardson	65, 947
Steel, Tempering	A. R. and N. B. Reynolds	70, 471
Steel, Tempering	F. G. Harris	70, 559
Steel, Tempering, after it has been welded to iron for cutting tools.	A. R. Reynolds	63, 096
Steel, tempering, Compound for	W. G. Esser	65, 892
Steel, welding, Compound for	C. Sparks	64, 805
Steel, Welding, to malleable iron and tempering the steel by one operation.	A. R. Reynolds	63, 097
Steelyards	W. A. Starratt	66, 533
Steel, &c., tempering, Pot for lead bath for	C. V. Wilson	65, 850
Steering apparatus	E. S. Coffin	61, 032
Steering apparatus	H. F. Hicks	61, 937
Steering apparatus	T. W. Murray	66, 615
Steering apparatus	E. F. Howard	66, 963
Steering apparatus	J. P. Teale and W. J. Brassington	67, 686
Steering apparatus	W. H. Foster	69, 558
Steering apparatus	J. Perkins	70, 255
Steering apparatus	J. H. Weaver	72, 945
Steering apparatus and car brake	T. W. Murray	68, 452
Stencil plate	G. R. Powers	64, 252
Steps, Folding	B. J. Harrison and J. Condie	71, 711
Steps for upright shafts	C. R. Tompkins	64, 724
Stereoscope	De Witt S. Rawson	61, 359
Stereoscope	A. Heilbrun	71, 753
Stereoscope	O. Goerke	72, 480
Stereoscopic apparatus	G. Beigel	70, 391
Stereotype casting	J. M. Willbur	71, 104
Stereotype plate holder	A. T. Dupuy	62, 826
Stereotype plates, Construction of papier mâché matrices for	W. Nelson	62, 058
Stick for trundling hoops	A. Doisy	72, 174
Still	A. C. Rand	62, 362
Still	G. Hadley	65, 564
Still	G. W. Bookwalter	71, 270
Still	I. P. Tice	72, 241
Still, Alcohol and spirit	H. G. Dayton	72, 816
Still for oil, &c., Construction of	J. Huntington	62, 750
Still for refining and distilling oil	S. Gibbons	63, 974
Still, Oil	D. Symonds	65, 136
Still, Petroleum	W. C. Wells	61, 291
Still, Petroleum	J. S. Shapter	61, 474
Still, Petroleum	E. G. Kelley	67, 983
Stills, oil and other, Indicating apparatus for	W. Hart	65, 078
Stills, Rectifier for	A. Werne	60, 975
Still to test the proof of spirits, Attachment for	W. James	61, 072
Still, Tubular, for continuous distillation	P. H. Vander Weyde	62, 096
Stilts	G. Murray	62, 224
Stirrup	N. L. Revere	66, 106
Stirrup	E. Pond	72, 417
Stirrup, Safety	S. F. Clark	68, 604
Stirrup, Safety	W. Weddington	70, 053
Stirrups, Attachment to	I. L. Landis	69, 920
Stirrups, Hanging	P. Selby	67, 357
Stitching horse	O. A. Dean	66, 808
Stockings, Machine-knitted	A. C. Carey	67, 264
Stocks, Fulling	W. B. Lodge	66, 095

Invention or Discovery.	Name of Patentee.	No.
Stone, Artificial	G. E. Van Derburgh	62, 166
Stone, Artificial	D. and W. McCaine	72, 412
Stone, artificial, Composition for	G. E. Van Derburgh	62, 165
Stone, artificial, Compound for making and for coating stone, brick, &c.	J. Tattershall	64, 594
Stone, artificial, Manufacture of	J. Nagele	62, 770
Stone-channelling machine	V. W. Blanchard	65, 469
Stone, Cutting	J. W. Maloy	70, 449
Stone-cutting machine	J. W. Maloy	61, 220
Stone dresser	B. S. Hunt	61, 009
Stone, Dressing	W. M. Murray	62, 056
Stone, Dressing	F. L. King	66, 716
Stone or marble, Grinding the surface of	J. A. Bachman	63, 982
Stone, Quarrying	G. J. Wardwell	69, 282
Stone, Quarrying	G. J. Wardwell	69, 283
Stone, Sad	H. W. Hopkins	60, 729
Stone ware, Manufacture of	E. T. Chapman	63, 138
Stool, Milking	D. Conner	61, 165
Stool, Piano	J. Briggs	71, 967
Stool, Piano-forte	G. Schmidt	66, 522
Stop cock, Cut-off	W. H. Pollard	67, 214
Stopper for bottles, jugs, &c.	J. B. Alexander	65, 857
Stopper, Hawse-pipe	J. Stewart	62, 902
Stove	M. Pond	69, 857
Stove	T. W. Wisner	72, 145
Stove, Automatic ventilating	R. Eaton	70, 979
Stove, Auxiliary air-chamber	E. Hawks	64, 102
Stove back plate	G. F. Filley	72, 179
Stove, Base-burning	C. J. Shepard	61, 365
Stove, Base-burning	W. C. Durant	65, 184
Stove, Base-burning	C. H. Frost	67, 283
Stove, Base-burning	G. G. Hunt	71, 306
Stove, Base-burning	C. M. Whelden	71, 347
Stove, Base-burning	J. Tiffany	72, 339
Stove, Coal	B. W. Dunklee	60, 840
Stove, Coal	N. A. Boynton	61, 602
Stove, Coal	A. Brown	61, 922
Stove, Coal	J. J. Low	63, 538
Stove, Coal	J. J. Low	63, 539
Stove, Coal	G. R. Moore	63, 926
Stove, Coal	G. R. Moore	66, 610
Stove, Coal	J. L. Hanson	66, 707
Stove, Coal	J. H. Stone	66, 907
Stove, Coal	W. C. Durant	66, 957
Stove, Coal	J. H. Keyser	66, 969
Stove, Coal	F. Gilman	68, 731
Stove, Coal	C. Pepper	69, 242
Stove, Coal	W. M. Bush and T. B. Richards	71, 129
Stove, Coal	F. C. Adams and J. Peckover	72, 580
Stove, Coal	A. Dart	72, 610
Stove, Coal	J. H. Keyser	62, 961
Stove, Coal-oil	F. H. Brown	60, 680
Stove, cook, Gasoline	J. D. Spang	70, 641
Stove, Cooking	S. S. Utter	61, 285
Stove, Cooking	F. C. Adams and J. Peckover	61, 790
Stove, Cooking	J. Marshall	61, 945
Stove, Cooking	J. J. Savage	61, 956
Stove, Cooking	G. W. Walker	62, 100
Stove, Cooking	O. G. Kennel, E. H. Smith, and G. L. Morrison	63, 907
Stove, Cooking	W. A. Greene	65, 375
Stove, Cooking	E. F. Livingston	65, 493
Stove, Cooking	D. E. Paris	66, 620
Stove, Cooking	D. E. Paris	67, 344
Stove, Cooking	C. Van De Mark	67, 383
Stove, Cooking	P. Low	67, 560
Stove, Cooking	D. E. Paris	67, 670
Stove, Cooking	L. W. Harwood	68, 072
Stove, Cooking	G. Perkins	68, 898
Stove, Cooking	W. C. Davis	69, 902
Stove, Cooking	M. Mead	69, 353
Stove, Cooking	C. H. Buck	69, 536
Stove, Cooking	H. Stickney	71, 421
Stove, Cooking	G. W. Walker	72, 342
Stove, Cooking	C. Van De Mark	72, 571
Stove, Cooking	W. B. Treadwell	72, 937
Stove, Cooking	W. B. Treadwell	72, 938
Stove, cooking, Gas	G. O. Sanderson	63, 815
Stove cover lifter	A. Shepard	63, 110
Stove cover lifter	G. W. Hunt	71, 388
Stove cover, lifter, hammer, &c., Combined	J. B. Oky	64, 247

Alphabetical list of inventions—Continued.

Invention or Discovery.	Name of Patentee.	No.
Stove door and fender, Convertible	C. Harris and P. W. Zoiner	65, 906
Stove doors, Handle for	C. H. Roberts	69, 841
Stove for carpenters' use	H. Dietz	66, 226
Stove for cooking, Lamp	C. Williams	64, 267
Stove for fireplaces, Heat radiating	J. Liddle	70, 233
Stove for heating sad-irons	J. P. Troxell	72, 242
Stove, Gas	C. M. Young and E. M. Benster	61, 788
Stove, Gas	J. Q. Birkey	70, 395
Stove, Gas	C. E. Alden	70, 494
Stove, Gas	A. L. Bogart	71, 269
Stove, Heating	Z. Hussey	60, 734
Stove, Heating	W. A. Barlow	60, 844
Stove, Heating	W. A. Barlow	60, 845
Stove, Heating	G. W. Beard	61, 795
Stove, Heating	T. Henney	62, 031
Stove, Heating	W. W. Carpenter	64, 282
Stove, Heating	D. J. Happersett	62, 416
Stove, Heating	W. Bamford	62, 726
Stove, Heating	G. R. Moore	63, 287
Stove, Heating	J. Martino, J. Beesley, and J. Currie	63, 646
Stove, Heating	J. H. Green	64, 526
Stove, Heating	J. S. Van Buren	64, 599
Stove, Heating	A. Lee	64, 884
Stove, Heating	A. Brown	64, 943
Stove, Heating	T. Yates	65, 524
Stove, Heating	J. Grossius	68, 299
Stove, Heating	M. C. Hull	71, 176
Stove, Hot-air	T. Henney	71, 171
Stove, Hot-air	J. Player	65, 599
Stove lid lifter	G. B. Scribner	67, 593
Stove, Nurse	L. A. Plumb	61, 863
Stove, Petroleum	J. Lee	63, 400
Stove, Petroleum and gas-heater	A. T. Boon	63, 004
Stove, Petroleum vapor	J. J. Riddle and W. S. Gray	65, 507
Stove pipe joint	H. M. Clifford	62, 183
Stove pipe joint	W. Stine	69, 506
Stove pipes, Cleaning	A. W. Smith	70, 636
Stove pipes, Cleaning	W. J. Nace	71, 500
Stove pipes, Heat radiating attachment for	J. Grabner	69, 798
Stove pipe shelf	L. Olds	66, 516
Stove pipe shelf	J. Turner	67, 048
Stove pipe shelf	O. B. Olmstead	67, 900
Stove pipes, Joint for	D. L. Millikin and O. M. Pillsbury	64, 552
Stove pipe thimble	T. Newell	60, 777
Stove pipe thimble	A. Hutchinson	68, 628
Stove pipe thimble	J. P. Gallagher	71, 602
Stove pipe to promote combustion	E. Hambujer	68, 437
Stove plate pattern boiler hole seat	A. P. Rich	66, 992
Stoves and furnaces	J. B. Driscole	71, 465
Stoves and furnaces, Door for	F. S. Bissell	67, 942
Stoves and grates, Fire back for	J. Habermehl	71, 297
Stoves, cook, Attachment for	J. Garrison	69, 203
Stoves, cooking and heating, Water back and grate of	G. Dewey	70, 077
Stoves, cooking, Ash and lifting pan for	J. H. Shear	62, 695
Stoves, cooking, Cover for	S. Raymond	63, 093
Stoves, cooking, Hinging covers to tops of	C. J. Ball	68, 029
Stoves, cooking, Pot-hole lid for	J. Stephen	67, 603
Stoves, cooking, Top for	J. Grimes	67, 977
Stoves, cooking, Top plate for	J. B. Crowley	69, 951
Stoves, cooking, Water reservoir for	C. Harris and P. W. Zoiner	70, 206
Stoves for generating gas, Attachment to	B. L. Fetherolf	64, 854
Stoves, furnaces, &c., Dust arrester in raking of	J. Martino	62, 763
Stoves, heating, Illuminating door for	G. R. Moore	67, 791
Stoves, kindling arrangement for	H. L. Byrd	62, 935
Stoves, Lining in	A. Packard	68, 383
Stove, Soapstone	A. H. Lowell	66, 365
Stoves or vessels, Frame for supporting	A. M. Duburn and J. Keith	62, 534
Stoves, polishing, Composition for	J. Murphy	61, 557
Stoves, Tool rest for	J. H. Keyser	68, 086
Stoves, Ventilating attachment to	T. S. Bowman	67, 945
Stove, Tinnors', for heating soldering irons	C. A. Buttles and J. Cowles	65, 341
Stove, tool and lantern, Combined	D. P. and M. P. Farnham	60, 869
Stove tops, Center plate for	P. Paradis and A. Reilly	65, 421
Stove, Wood-burning	G. G. Wolf	64, 616
Strainer	F. Morton	62, 872
Strainer	R. J. P. Goodwin	63, 879
Strainer and bucket, Milk	D. N. West	68, 400
Strainer, Coffee and tea pot	M. Simons	62, 697
Strainer, Cream	G. J. Bennett	66, 552
Strainer, Milk	S. Van Auken and J. H. Graham	66, 753
Strainer, Milk	W. F. Rossman	68, 793

Alphabetical list of inventions—Continued.

Invention or Discovery.	Name of Patentee.	No.
Strainer, Press	J. E. Phillips	63, 090
Strap attachment	A. Bedford	68, 341
Strap fastening	R. Gibbons	72, 385
Strap for school books, Clamp	J. W. McKee	69, 234
Strap, Hitching	J. D. Miller	68, 569
Strap, Hitching	A. J. Ross	70, 473
Strap, Hitching	T. P. Chambers	71, 699
Strap-holding device	G. W. R. Combs	70, 320
Straps, fly net, Cutting and punching	J. Yeager	71, 259
Straps, fly net, Rounding	C. K. Burkholder and H. Lerew	68, 949
Straw and hay, Cutting	D. T. Robinson	61, 871
Strawberry ripener	C. Jillson	69, 346
Strawberry trellis	W. W. Wilcox	68, 271
Straw board, sheets of paper, &c., Drying	R. T. Knight	63, 259
Straw carrier	W. Hilser	67, 543
Straw carrier and grain separator, Combined	A. T. Dunbar and A. McNaught	61, 816
Straw cutter	W. Gale	61, 932
Straw cutter	W. Gale	61, 933
Straw cutter	W. Gale	61, 617
Straw cutter	J. D. Smith	69, 593
Straw cutter	A. Buch	70, 464
Straw cutter	S. Elliott	70, 539
Straw cutter	H. Parks	70, 891
Straw cutter	J. T. Harvey	71, 000
Straw cutter	J. W. Mauzy and J. Hughes	72, 062
Straw cutter	J. Weichart	72, 249
Straw cutter	B. Suverkrup	72, 936
Straw for food, Preparing short cut	C. Brown	68, 345
Street crossing and sewer inlet	J. A. Miller	63, 284
Street sweeper	R. Y. McConnell and G. Pringle	71, 894
Stretcher for hosiery	S. J. Wright	69, 293
Stretcher for painters' canvas	M. K. Kellogg	69, 447
Strictures, Instruments for obliterating, &c	G. N. Palmer	68, 647
String tag	S. B. Fay	64, 298
Stubs, Cutting	W. Lyon	65, 248
Stud and button-hole fastening	V. Charlet	67, 623
Stud and sleeve button	B. Clayton	62, 008
Stud fastening	G. A. Lingard	61, 671
Stud fastening	B. Moser and D. Yellott	65, 932
Stud, Shirt	G. M. White	67, 691
Stump extractor	D. Stauffer	61, 110
Stump extractor	J. M. Gleichman	62, 192
Stump extractor	H. Lemm	62, 346
Stump extractor	M. Mellen	63, 918
Stump extractor	J. D. Huffman	64, 106
Stump extractor	G. W. Townsend	64, 384
Stump extractor	D. Carroll	64, 628
Stump extractor	I. Pardee and R. C. Parvin	65, 263
Stump extractor	H. M. Gibson	65, 482
Stump extractor	G. Chamberlin	65, 724
Stump extractor	L. R. Dye	67, 738
Stump extractor	I. H. Palmer	68, 228
Stump extractor	I. D. Hazen and J. Hitchcock	69, 209
Stump extractor	G. W. Pressey	69, 701
Stump extractor	G. J. Olendorf	69, 832
Stump extractor	J. Turner	71, 088
Stump extractor	A. Crouner	72, 268
Stump extractor	J. Elliott	72, 826
Sugar	J. W. Reid	69, 249
Sugar and other substances, draining, Centrifugal machine for	D. M. Weston	63, 770
Sugar and sirup, Manufacture of	E. Porter	62, 440
Sugar and sirup, Refining	H. A. Williams	68, 328
Sugar-boiling apparatus, Vacuum pan	C. Harriman	66, 080
Sugar, boiling, Vacuum pan for, and for other purposes	F. O. Matthiessen	66, 370
Sugar-cane stripper	S. T. Hudson	64, 875
Sugar, Centrifugal machine for draining	A. Mackey	65, 923
Sugar, crushing, rolling dough, &c., Machine for	G. Perkins	64, 029
Sugar crystallizing tank or wagon	F. O. Matthiessen	66, 369
Sugar, Draining	H. A. Coppess	65, 546
Sugar, Draining	C. Macumber	66, 241
Sugar, Draining	J. B. Hill	71, 876
Sugar, Draining	J. B. Hill	71, 877
Sugar, Drying loaves of	W. M. Davis	65, 352
Sugar evaporator	S. M. Shattuck	62, 292
Sugar evaporator	L. Lefebvre	69, 684
Sugar, Granulating	F. Michael	62, 146
Sugar in centrifugal machines, Liquoring	R. T. Sprague	67, 924
Sugar, Making	D. Bruce	61, 314
Sugar, Manufacture of	F. O. Matthiessen	61, 224
Sugar, Mixing	M. L. Senderling	60, 797
Sugar, Raising the grade of raw	A. Mackey and E. Müller	67, 662
